AI PRODUCT MANAGER · PRODUCT BUILDER

Luis Alberto Dávalos

AI Product Manager focused on turning business needs into AI, automation and agent products. I combine discovery, strategy, flow design and functional demo building with a strong focus on customers, security and learning.

EXPERIENCE

Co-founder and AI Product Manager

Datway.ai · Freelance · 2023–2025

• Designed and delivered AI products end to end, from requirements and roadmap to demo and documentation.

• Built TypeScript and Voiceflow chatbots, Make/Zapier/n8n automation, agents and data pipelines.

• Managed clients and stakeholders, agile prioritisation and preparation for product evolution and scale.

SELECTED PROJECTS

PropIA

A multi-agent system for finding, analysing and reporting real-estate opportunities using user-defined criteria.

Onchain Agent

A reinforcement-learning lab with Gymnasium, RecurrentPPO, three strategies and comparative evaluation.

The Looper

A mobile product for organising matches, recording voice scores and activating club communities.

FocusFlow

A Chrome extension with Pomodoro, distraction blocking and an Eisenhower matrix.
